<sup>1</sup>Pump deck shipped separately, field connection required.

<sup>2</sup>Operating level based upon allowing for 30 feet of vertical riser and typical cooling tower drain down.

<sup>3</sup>Operating level based upon allowing for 30 feet of vertical riser drain down.

<sup>4</sup>Dimensions are for general reference only.

<sup>5</sup>Weights shown are for a typical 3-pump arrangement. Actual weight of system will vary depending on pump and option selections.

Typical 3-pump pump/reservoir system with dual-standby discharge manifold and control panel shown for general reference. Each pump/reservoir is custom designed based upon the specific pumps and options ordered.
